Art Unit: 1112

1). Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 1-13 and 26-33, drawn to a reactor, classified in class 118, subclass 715.

II. Claims 14-25, drawn to an assembly process, classified in class 29, subclass 428.

2). III. Claims 34-45, drawn to a CVD process, classified in class 427, subclass 249.

3) The inventions are distinct, each from the other because:

4) Inventions Group III or II and Group I are related as process and apparatus for its practice. The inventions are distinct if it can be shown that either: (1) the process as claimed can be practiced by another materially different apparatus or by hand, or (2) the apparatus as claimed can be used to practice another and materially different process. (MPEP § 806.05(e)). In this case the apparatus as claimed can be used to practice another nd materially different process such as etching.

5) Group II and Group III are materially different each from the other because Group II is directed to assembly ^ehating filaments and electrode, however, Group III is directed to depositing diamond on a substrate by CVD.

Art Unit: 1112

6) Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, and the fields of search are not co-extensive, restriction for examination purposes as indicated is proper.

7) Applicant is advised that the response to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

8) Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a diligently-filed petition under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(h).

9) Any inquiry concerning this communication should be directed to Roy V. King at telephone number (703) 308-0661.
